

Aspiring Data Scientist with a strong foundation in Python, SQL, and Generative AI. Passionate about leveraging data to drive business decisions and eager to contribute innovative solutions.

SKILLS

Programming Languages	Java, Python (Flask)
Frontend	Html, CSS, Javascript, ReactJS
Data Visualization	Data Visualization, Matplotlib, Seaborn, PowerBI
Machine Learning	PyTorch, Scikit-learn, TensorFlow
Frameworks & Tools:	LangChain, Hugging Face, LangSmith, RAG

TECHNICAL EXPERIENCE

Software Intern <i>Bluestock Fintech</i>	Oct, 2024 — Jan, 2025 <i>Remote</i>
--	---

- Developed and implemented a responsive front-end web application using Tailwind CSS, translating UI/UX wireframes provided by management into pixel-accurate, production-ready interfaces.
- Built and maintained RESTful backend services using Node.js, handling business logic and server-side processing for fintech application workflows.

Summer Intern <i>Celebal Technologies</i>	May 2024 — August 2025 <i>Hybrid</i>
---	--

- Architected and deployed a 3-tier web application on AWS, separating presentation, application logic, and database layers across EC2 instances, with load balancers and RDS for high availability.
- Implemented AWS Auto Scaling groups with dynamic scaling policies to automatically adjust compute capacity based on traffic demand, optimizing cost and performance.

PROJECTS

Multi-Agent AI Research System <i>MultiMind</i>	Tech Stack <i>LangChain, OpenAI / LLM APIs , Streamlit, Web Scraping, Prompt Engineering</i>
---	--

- Designed a **Search Agent** using LangChain to retrieve real-time, reliable web data via live search APIs.
- Built a **Reader Agent** that autonomously scrapes and extracts deep content from relevant URLs for contextual analysis.
- Developed a professional **Streamlit UI** providing an intuitive interface to trigger and visualize the full multi-agent workflow.
- Implemented a **Writer Chain** to synthesize extracted data into structured, detailed research reports using LLMs

Web Based Operating System <i>Shellter</i>	Tech Stack <i>React.js, Node.js, PostgreSQL, AWS (VPC, EC2, CDK, Lambda, CloudWatch, EBS)</i>
--	---

- Architected a full-stack cloud desktop platform that provisions isolated AWS VPC environments per user on signup, enabling complete browser-based OS access with zero local installation.
- Built an automated infrastructure provisioning pipeline using Terraform and AWS CDK that spins up VPC, subnets, security groups, and EC2 instances dynamically based on user OS selection (Linux, Windows, custom AMI).

EDUCATION

Bachelor of Technology, Computer Science Arya College of Engineering (Rajasthan Technical University)	2025 CGPA: 7.8
Higher Secondary Nobel International School (RBSE)	2020 CGPA: 7.2

ACTIVITIES

Microsoft Azure AI Fundamentals (AI-900)
Microsoft Azure AI Engineer Associate (AI-102)
Oracle AI Foundations Associate
Certified LLM Security Professional (CLLMSP)
